

Salesforce Interview Readiness Bootcamp

– Day 3

Part 1 – Interview Warm-up

1. What is a Validation Rule?

A Validation Rule checks data before saving a record.

2. What is a Flow?

A Flow automates business processes without coding.

3. What is an Apex Trigger?

An Apex Trigger is code that runs automatically when records change.

4. When would you choose a Flow instead of a Trigger?

Use a Flow for simple automation without code.

5. Can a Validation Rule update another field?

No. It only validates data.

6. Which executes first: Validation Rule, Flow, or Trigger?

Validation Rules check the data before the record is saved.

7. What is a Record-Triggered Flow?

It runs automatically when a record is created or updated.

Part 2 – Business Scenario

The Placement Management System was automated using Validation Rules and Record-Triggered Flows. The system automatically fills the Application Date, sends emails, validates data, and creates Offer Letter records.

Part 4 – Hands-on Assignment

A Record-Triggered Flow was created to automatically set the Application Date and send an email when a new application is created.

Flow Definitions								
All Flows ▾ 								
47 items • Sorted by Flow Label • Filtered by All flow definitions • Updated a few seconds ago								
  								
Flow Label ↑	Process Type	Active	Tem...	Package State	Pack...	Last Modified By	Last Modified Date	
Application Automation Flow	Autolaunched Flow	☒	☐	Unmanaged		Bhanu Durga Ram Prasad	30/07/2026, 4:23 pm	
Approvals Workflow: Evaluate Approval Requests	Screen Flow	☒	☒	Managed-Installed				
Approvals Workflow: Process Approval Submission	Screen Flow	☒	☐	Managed-Installed				
Authentication Provider User Registration	Identity User Registration Flow	☐	☒	Managed-Installed				 
Auto Populate Application Date	Autolaunched Flow	☒	☐	Unmanaged		Bhanu Durga Ram Prasad	30/07/2026, 3:22 pm	
Basic Approval Request	Flow Orchestration for CMS	☒	☒	Managed-Installed				
Cancel All Eligible Items Flow	Screen Flow	☐	☒	Managed-Installed				
Cancel Item Flow	Screen Flow	☐	☒	Managed-Installed				

Part 5 – Validation Rule Challenge

Validation Rule 1 – CGPA Validation

Formula

Student__r.CGPA__c < Job__r.Minimum_CGPA__c

Validation Rule 2 – Application Date Validation

Formula

Application_Date__c > Job__r.Closing_Date__c

Validation Rule 3 – Mandatory Fields

Formula

OR(
ISBLANK(Student__c),
ISBLANK(Job__c)
)

Part 6 – Trigger vs Flow Debate

Situation	Solution
Update Field	Flow
Create Record	Flow
Send Email	Flow
REST API	Apex Trigger
Complex Logic	Apex Trigger
Bulk Records	Apex Trigger

Part 7 – Mini Project Enhancement

Implemented:

- Record-Triggered Flow
- Validation Rules
- Email Notification
- Offer Letter Creation

Part 8 – Debugging Challenge

1. What problem might occur?

Automation may conflict.

2. Could automation repeatedly execute?

Yes, repeated updates can occur.

3. How would you redesign it?

Use one Record-Triggered Flow and Apex only when necessary.
